NUCLEAR REGULATORY COMMISSION

[Docket No. 72-27; NRC-2018-0282]

Pacific Gas & Electric Company;

Humboldt Bay Independent Spent Fuel Storage Installation

AGENCY: Nuclear Regulatory Commission.

ACTION: License renewal; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has issued a renewed license to Pacific Gas and Electric Company (PG&E), ("licensee") for Special Nuclear Materials (SNM) License No. SNM-2514 for the receipt, possession, transfer, and storage of spent fuel from the Humboldt Bay Nuclear Plant in the Humboldt Bay Independent Spent Fuel Storage Installation (ISFSI), located in Humboldt County, California. The renewed license authorizes operation of the Humboldt ISFSI in accordance with the provisions of the renewed license and its technical specifications. The renewed license expires on November 17, 2065.

DATES: The license referenced in this document is available on June 10, 2020.

SUPPLEMENTARY INFORMATION:

I. Discussion

Based upon the application dated July 10, 2018, as supplemented October 22, 2018, July 1, 2019, July 25, 2019, and November 21, 2019, the NRC has issued a renewed license to the licensee for the Humboldt Bay ISFSI, located in Humboldt County, California. The renewed license SNM-2514 authorizes and requires operation of the Humboldt Bay ISFSI in accordance with the provisions of the renewed license and its technical specifications. The renewed license will expire on November 17, 2065.

The licensee's application for a renewed license complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the NRC's rules and regulations. The NRC has made appropriate findings as required by the Act and the NRC's regulations in Chapter 1 of title 10 of the *Code of Federal Regulations* (10 CFR), and sets forth those findings in the renewed license. The agency afforded an opportunity for a hearing in the Notice of Opportunity for a Hearing published in the

Federal Register on December 26, 2018 (83 FR 66314). The NRC received no request for a hearing or petition for leave to intervene following the notice.

The NRC staff prepared a safety evaluation report for the renewal of the ISFSI license and concluded, based on that evaluation that the ISFSI will continue to meet the regulations in 10 CFR part 72. The NRC staff also prepared an environmental assessment and finding of no significant impact for the renewal of this license, which were published on May 5, 2020 (85 FR 26734). The NRC staff's environmental assessment included the impacts of continued storage of spent nuclear fuel (as documented in NUREG-2157, "Generic Environmental Impact Statement for Continued Storage of Spent Fuel"). The NRC staff concluded that renewal of this ISFSI license will not have a significant impact on the quality of the human environment.
